

Experience advanced analytics and live dashboard reporting through our software-enabled measuring and monitoring solution. Clients can now deliver reporting on ESG performance more efficiently and cost effectively. Leveraging purpose-built systems at a fraction of the cost. Our dashboards are built using:

FIT-FOR-PURPOSE SOFTWARE

- **Power BI** is a business analytics service by **Microsoft**. It aims to provide interactive visualizations and business intelligence capabilities with an interface for end users to view reports and dashboards;
- As a Microsoft Office product, Power BI entails negligible additional fees/software costs;
- **DAX** (Data Analysis Expressions) is a formula expression language used in the Power BI visualization tools. DAX allows for complex analyses in large data models; and
- Compatible reporting-format export options, including online publication.

TECHNICAL RIGOR

- The expertise of ESG data scientists and data analysts, with over 20 years of technical experience;
- Bespoke customisations around stakeholder engagement and materiality determination, relative to best-practice industry benchmarks;
- Built-in thresholds and validation for early warning and input error detection;
- Email flagging and escalation for missing data;
- Automatic scheduling of online data collection; and
- Fully interactive and contextualised data models, with live-slicer, drill-through and filtering functionality.

ENHANCE CREDIBILITY | LOWER THE COST OF CAPITAL RAISING | DECREASE ADMIN INTENSITY | INCREASE DATA QUALITY | BE A MARKET LEADER

1. DATA COLLECTION

2. DATA EXTRACTION & MANAGEMENT

3. ESG/IMPACT CONTEXTUALISED DATA DASHBOARD
